

Short Bio of Diego Marine

Diego Marín is the Deputy Director of the Clinical Laboratory at Genomic Prediction, New Jersey, USA, and is certified as a High Complexity Clinical Laboratory Director (HCLD) by the American Board of Bioanalysis (ABB).

Trained as an embryologist, he holds a Master's degree in Clinical Embryology from IVI Valencia and a Ph.D. in Reproductive Genetics completed at RMA of New Jersey and Thomas Jefferson University in Philadelphia. Diego is an Adjunct Professor in the Department of Human Genetics at Rutgers University, New Jersey, where he enjoys mentoring students and fostering their growth in the field of reproductive genetics.

His primary research interests focus on the origins of aneuploidy, polygenic risk scoring, and gene editing in human embryos. He has authored numerous peer-reviewed publications and has actively contributed to advancing reproductive genetics through research, education, and collaboration.
