

Dr. Manuel Viotti is Senior Scientist at the Zouves Foundation for Reproductive Medicine. He heads the research efforts to improve outcomes in the IVF clinic, with a special focus on molecular and cell biology of the embryo and uterine environment. He earned his PhD in developmental biology from Weill Cornell Graduate School of Medical Sciences and the Sloan-Kettering Institute (New York, NY), and then joined the biotechnology company Genentech (San Francisco, CA) as a Postdoctoral Researcher.

He became involved with the establishment of the Zouves Foundation (Foster City, CA) in 2017, and since then the scientific work of his group has featured in *Fertility and Sterility*, *Human Reproduction*, *RBMO*, *JARG*, and others. He also engages in clinical embryology and PGT-A and is certified by ABB(HCLD) and ASCP(MB).
