24th INTERNATIONAL CONFERENCE ON PREIMPLANTATION GENETICS, Prague,

Czech Republic, May 27-29, 2027

Dear colleagues, Dear friends,

We are very pleased to invite you to the **24th International Conference on Preimplantation Genetics (PGDIS 2027)** organized by Preimplantation Genetic Diagnosis International Society (PGDIS) in **Prague, Czech Republic**, May 27-29, 2027.

Genomic technologies are dramatically changing our abilities to map life and with ever decreasing costs and increasing power to map the full genome, they are transforming our ability to map the genetic variation in embryos, understand biological aspects of early embryonic development, changing preimplantation genetic testing approaches, providing novel insights into causes of infertility and opening new avenues for embryo selection. These novel tools and different applications provide novel opportunities to improve IVF success rates and embryo selection, but the plethora of options can be confusing the medical community. PGDIS acts on this interphase between promoting scientific progress and provides a forum to discuss best practices and ways forward.

The conference will bring together key scientific leaders in genetic aspects of early development as well as leading laboratories pioneering new applications to improve reproductive care. This conference will have as a common thread: **“clinical value brought through new preimplantation genetic breakthroughs”**. While PGDIS targets the genetic community involved in reproductive care, we will have a special attention to reach out to the obstetric community with both teaching and scientific session translating novel fundamental insights into clinical care and patient solutions. We want to reach out to young clinicians, clinical geneticists and reproductive care professionals. Sessions will include all hot topics on the genetics of fertility and preimplantation genetic testing.

For further information on Conference please contact Conference Secretariat info@pgdis2027.com, visit Conference Website (www.PGDIS2027.com) or PGDIS website (www.pgdis.org).

Save the date!

We look forward to meeting you all in Prague.

Joris Vermeesch
President of PGDIS

Katerina Vesela
Chair Local Organizing Committee

Anver Kuliev
Executive Director of PGDIS
